NAUSICAA
MEDICAL

Made in France
since 1992

www.nausicaa-medical.com

This medical device is intended for patient holding and positioning. It is not a restraint system.
Before each use, it is important to check: the presence of the label, the stitches of the straps: that they do not fray or break, that the device does not show tears, snags, holes or signs of fraying (fabric and straps), that the buckles are not cracked or have no weak fastening.

MINI-PELVIC BELT

HOSPITAL RANGE
High tenacity 100% polyester net
100% polyester bias
100% polyester strap
Nylon buckle

• Place the part « pelvic holder » on the seat of the chair, the narrowest part to the backrest.

• Pass the strap of the narrowest part around the backrest of the chair, firmly adjust it and close the buckle.

• Sit the patient on the chair.

• Place the pelvic holder between the patient's legs and raise it on the abdomen.

• Adjust the pelvic part to avoid creases.

• Pass the strap which has not been used yet behind the backrest, close the buckle, adjust the length of the strap while being careful not to compress the abdomen of the patient.
